EDUCATION

Srinakharinwirot University (GPA 3.82)
Bachelor of Computer engineer
Graduated with First-Class Honors
2021 - 2025

SKILL

PROGRAMMING LANGUAGE

- JavaScript • Kotlin
- TypeScript • Python
- Java • Swift
- Dart

LANGUAGE FRAMEWORK

- **Mobile** : Flutter , React native, Kotlin , Swift
- **Frontend** : React.js , Vue.js , Next.js
- **Backend** : Node.js , Nest.js , Java Springboot

OTHERS

- **Version Control** : Git, GitHub
- **Testing Tools** : Postman
- **Cloud & Backend Services**: Firebase, Docker
- **Database** : Mysql , PostgreSQL , MongoDB , Firebase Firestore

SOFT SKILL

- Adaptability
- Responsibility
- Teamwork

CERTIFICATE

- NTT Digital Innovation Challenge 2023
- Foundation of Cybersecurity
- Received the Academic Excellence Medal for the year 2024 from EIT

LANGUAGES

- THAI (NATIVE)
- ENGLISH (INTERMEDIATE)

ABOUT ME

I'm a Fullstack Developer experienced in building both frontend and backend systems using React, Vue, Flutter, Node.js, and Spring Boot. I enjoy writing clean, scalable code to solve real-world problems.

WORK EXPERIENCE

Freelance - Mobile Developer

Jan - Feb 2025

- Developed app using Flutter with Bloc State Management.
- Enabled background execution for continuous step tracking.
- Utilized Firebase as the database for storing user activity

Internship - Web & Mobile Developer | CDG Group

Jun - Dec 2024

- Developed a responsive web application using Vue.js and Vuetify.
- Upgraded and optimized the company's existing Flutter applications to the latest stable versions.
- Explored and applied NestJS in building backend components as part of a learning project.

Freelance - Mobile Developer

July - Nov 2024

- Developed a cross-platform mobile application using Flutter for spinal posture monitoring.
- Utilized Riverpod for state management and Firestore Database
- Implemented real-time Bluetooth sensor connectivity to process

PROJECTS

Social Media Management App

- Built backend with Nest.js and Passport.js for authentication.
- Used Sequelize as the ORM and Swagger for API documentation.
- Developed a mobile application using Flutter with Bloc.

MERN-Medical Expert System

- Create with the MERN stack. (React,Nodejs,Express,MongoDB)
- Use Tailwind CSS for styling.
- Create prediction Inference engine

Ecommerce - Java

- Built E-Commerce system using Java Spring Boot.
- Implemented JWT token for secure API access.
- Integrated PostgreSQL with JPA for data management.

BookNest - Kotlin Mobile App

- Developed a mobile book management app using Kotlin and MVVM architecture.
- Implemented search functionality and state handling with LiveData
